DETAILED ACTION
EXAMINER'S AMENDMENT

- 1.1 An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 1.2 Authorization for this examiner's amendment was given in a telephone interview with Lawrence Gabuzda on 3/13/2009.
- 1.3 Please make the following amendments to the abstract:
- Disclosed is installation of an optical fiber composite electric power cable. An installation method of an optical fiber composite electric power cable includes installing an electric power cable including a conductor and an air-blown installation tube therein at an installation region; connecting tubes of adjacent electric power cables to each other, in an electric power cable connection box; and installing an optical fiber unit into the connected tubes by air pressure. Also, a cable structure used for installing the optical fiber composite electric power cable includes a conductor for electric power transmission; an insulator surrounding the conductor; an air-blown installation tube provided ~~out~~ outside of the insulator; and a corrosion-protective layer provided to an outermost layer of the cable.
- 1.4 Please make the following amendments to the specification:
- At page 2, paragraph 9, change:
- In another aspect of the invention, there is also provided a cable structure used for installing an optical fiber composite electric power cable, which includes a conductor for electric power transmission; an insulator surrounding the conductor; an air-blown installation tube provided ~~out~~ outside of the insulator; and a corrosion-protective layer provided to an outermost layer of the cable.
- 1.5 Please make the following amendments to the specification:
- At page 4, paragraph 27, change:
- conductor 100 for electric power transmission, an insulator 102 surrounding the conductor 100, at least one air-blown installation tube 105 provided ~~out~~ outside of

Art Unit: 2883

the insulator 102, and a shielding layer 107 and a corrosion-protective layer 108 provided out of the air-blown installation tube 105.

1.6 Please make the following changes to Claim 3:

3. (currently amended) A cable structure used for installing an optical fiber composite electric power cable, comprising: a conductor for electric power transmission; an insulator surrounding the conductor; an air-blown installation tube provided ~~out~~ outside of the insulator; a corrosion-protective layer provided to an outermost layer of the cable; and tube protecting bodies contacting with both sides of the air-blown installation tube, wherein the tube protecting bodies are made of material having lower strength than the air-blown installation tube.

Allowable Subject Matter

- 2.1 The following is an examiner's statement of reasons for allowance: Claims 3-4, 7-8 are allowed for the following reason/s: The instant application is deemed to be directed towards a non-obvious improvement over the invention patented in U.S. Patent No.6101304 to Quistorff.
- 2.2 Claim 3 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a cable structure used for installing an optical fiber composite electric power cable comprising an air-blown installation tube provided outside of the insulator; and tube protecting bodies contacting with both sides of the air-blown installation tube, wherein the tube protecting bodies are made of material having lower strength than the air-blown installation tube.
- 2.3 Claims 4, 7-8 are dependant upon claim 3 and are thus also allowable.
- 2.4 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 3.1 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Guy G. Anderson whose telephone number is
